Small avalanche north of Bridger Bowl

The Ramp Bridger Range 1/22/2019 Code SS-R2-D1.5-I Latitude 45.82710 Longitude -110.93200 Notes

"We noticed this broken <u>slab</u> debris en route to ski the ramp north of Bridger Bowl yesterday. It was at the ridge line, and the crown was about 18 inches tall. It didn't <u>slide</u> very far, due to its lower angle (<30 degrees) and it is unclear if it slid naturally or from a skier poking over to check it out. It was located above cliffy, high consequence terrain."
