Woody Ridge

Date Sat, 03/20/2021 - 18:18 Activity Skiing

Had Woody Ridge Trail to myself this morning! Doesn't happen very often! Skiied up a ways and then bushwhacked onto the knob. Skiied north slope. Over a foot of new heavy snow. Snow underneath the fresh was isothermal. Needless to say there were a couple of good faceplants. Stayed right around 30-32degrees. Snowed almost all day. Warmed up for an hour or so.

Region Cooke City Location (from list) Woody Ridge Observer Name Steve Dober
