

Pyramid Point, wind slab avalanche, 10,000ft. East Aspect

Date

Sat, 03/27/2021 - 11:30

Activity

Skiing

We were skinning up Pyramid Point from the East. as we approached 10,000 ft, we encountered a wind slab on an East Facing slope. it was about 1-2 inches where we encountered it but it quickly propogated. the crown was 18-20 inches at its highest and about 150 feet wide. the debris ran for about 200 feet.

Region

Southern Madison
