

Beehive to Bear Basin

Date

Sat, 03/27/2021 - 22:30

Activity

Skiing

ECTPx at the base of the steep skin to gain the ridge between Bee and Bear. Observed copious blowing snow off the cornices into Bear Basin. We entered Bear Basin from the ridgeline, south of the cornices and dug a pit on low angle terrain below the ridgeline. ECTPx and no shearing or propagation was observed with additional effort.

Region

Northern Madison

Location (from list)

Beehive Basin

Observer Name

Bee-Bear
