

## Natural wet loose slides in Absarokas

Livingston

Out of Advisory Area

4/28/2021

Code

WL-N-R2-D2

Elevation

9000

Aspect Range

NW, W, S

Latitude

45.42600

Longitude

-110.49500

Notes

From obs 4/28/21: "Observed numerous natural wet loose slides probably occurring over the past 48 hours on NW-W-S aspects mid-elevation. Point releases from rock bands and couloirs shedding. Photo for example, which shows W facing bowl with slides visible from US-89 in Paradise Valley. These are between 8500' and 9500' on an unnamed peak just northeast of Dexter Point."

Number of slides

1
