

Snow in Hyalite

Date

Tue, 03/08/2022 - 15:25

Activity

Skiing

Skied History Rock around 5pm this evening ~25cm new snow at the top meadow, snow was tapering off, winds were calm. Did a quick shovel tilt, new snow seemed well bonded to the melt freeze crust underneath.

Region

Northern Gallatin

Location (from list)

History Rock

Observer Name

Mike Lavery
