

## Correction to previous submission

Date

Tue, 04/19/2022 - 10:25

Activity

Skiing

Snowmobiling

Dates on Avalanche Activity are incorrect. Should read:

Avalanche activity: 4/15 none 4/16 - a couple very small natural loose snow slides. 4/17 - natural 6-16" slabs on heavily wind loaded slopes on east [aspect](#) of Sheep Mtn., north face of Miller and east Wolverine mostly D1-1.5; a couple 2-4" deep, 10' wide slabs on small hills lower down; and two skier triggered D1.5 loose snow/storm slabs on the east [aspect](#) of Miller Ridge. Nothing very big or notable. 4/18 - Large D2 natural [slab](#) on east facing Mineral, wind loaded slope below cliffs, from yesterday or maybe this morning. Rollerballs and pinwheels by 11 am, and a couple wet loose slides below cliffs on southerly slopes around noon. I was able to easily make pinwheels on west-southwest aspects around 1230-1pm on my way out.
