

Warming snowpack @ lick creek

Date

Fri, 11/25/2022 - 10:20

Activity

Skiing

Surface hoar forming in sunny spots at lower elevations

Pin wheels coming down on south facing road cuts

Backside skiing was already getting heavy just after 10, reasonably heavily trafficked since last storm, someone ski cut just below cornice with no movement.

Front side has a supportable sun crust under the last 4" storm

Region

Northern Gallatin

Location (from list)

Lick Creek

Observer Name

Bill Schell
