Activity

Skiing

My partner and I dug a pit at 8553ft on a SW aspect in the sheep creek drainage outside of Cooke City. Our results were an ECTp13 Q3 @35cm. Our pit was 80cm deep. Layers we found from the top down in our pit:

- 80cm-50cm fist hard
- 50cm-43cm 4 finger
- 43cm-39cm 1 finger
- 39cm-ground fist hard

We also experienced whumphing on our tour which made us dig down and see what was going on in the snow.

Region

Cooke City

Location (from list)

COOKE CITY
