

Dry loose and small slab avalanches in Cooke

Date

Tue, 01/17/2023 - 15:15

Activity

Skiing

Noted a couple of fresh [slab](#) avalanches out there today. Both were on northerly aspects around 9300'. Photo of one attached.

Also of note, we did not find any buried SH in 3 snowpits north of Cooke City late last week. Though definitely continuing to look for it..

Region

Cooke City

Location (from list)

COOKE CITY

Observer Name

Beau Fredlund
