

Poor test scores on Ernie Miller Ridge

Date

Sat, 02/11/2023 - 14:00

Activity

Skiing

Poor test scores in our pit, but deep snow.

HS 190cm

ECTP 22, 190-155cm, Q1 shear (fist to 4F)

ECTP 27, 155-135cm, Q1 shear (4-1F)

Shear 135-115cm, Q1 (1F)

All on 1-2mm facets. Pretty nasty layer cake, we skied less than 30° after digging. Obvious wind effect on the steep bowl, no recent activity but hard wind slabs above 9500' pretty much everywhere

Pit location: 9120ft, 44.94353, -111.1315

Region

Southern Madison

Location (from list)

Ernie Miller Ridge

Observer Name

Garrett Stevens
