

The Gullies Are Dangerous

Date

Thu, 12/07/2023 - 12:25

Activity

Ice Climbing

8" of snow fell in 3 hours this morning. We inspected the snowpack in the gully above Silken Falls for the Bozeman Ice Festival. New snow and wind are increasing the avalanche danger. Be careful crossing gullies, especially the one above the Sceptor, the one below Responsible Family Man, Avalanche Gulch and Silken Falls. Triggering an avalanche in these is a very real possibility as they continue to get wind-loaded.

Region

Northern Gallatin

Location (from list)

Hyalite - main fork

Observer Name

Doug Chabot
