

Whumpfs and a Natural Avalanche in Flanders

Flanders Creek
Northern Gallatin
2/11/2024
Code
N
Aspect
N
Latitude
45.44020
Longitude
-110.93100
Notes

From obs: "Skied the whitebark glade on Flanders and got several whumpfs at the mid and upper elevations. Light overnight and continued [wind loading](#). There was a recent avalanche that appeared to be a [wind slab](#) with decent propagation on a north facing rocky slope. Visibility was too poor to get a good look or photo. "
