

Cracks and whumpfs in tele meadows

Date

Sat, 01/20/2024 - 11:55

Activity

Skiing

Had a nice tour in tele meadows in the AM given the avy danger. Snowpack was 5-8" of wetter snow on top of the old facet layer.

Every time we stepped away from the skin track or skied untracked snow heard a few whumpfs and saw shooting cracks (most in the few foot range but a few extended 40-50' across the slope).

Region

Southern Madison

Location (from list)

Telemark Meadows
